

Inland Region OAs' Heat Planning Contingencies June 19, 2018	
Alpine	No action required at this time.
Amador	Per OES, the temperatures being forecast are not unusual in Amador County for this time of year and there is a 25 to 30 degree cool off each night.
Butte	They are monitoring the situation.
Calaveras	An email was sent out to all of County personnel/staff to advise them of this weekend heat encourage clients and staff to stay cool and safe in hot weather. They will be monitoring the situation and take action if needed.
Colusa	Per the county it will be business as usual. No cooling center will be open. They plan to refer the public to their hospital's waiting room (24 hours a day) and the Sheriff's Office exterior lobby as places they can use for short term use.
El Dorado	No plans at this time El Dorado. Temperatures do not meet their decision points.
Fresno	The county does not anticipate to reach their trigger points; however, they plan to open cooling centers when temperatures are expected to reach 105 degrees or above.
Glenn	Cool zones were announced last week, shared with partners, and posted on social media (along with the webpage). The county will likely post a reminder on social media on Friday.
Kern	Kern is monitoring the situation and are prepared to open a cooling centers if necessary.
Kings	If the county reaches its heat trigger criteria, Public health will send out press releases on the cool places, they update 211, and get the word out through their agencies and partner agencies.
Lassen	No action required at this time.
Madera	The county has excessive heat plans and they will be opening cooling centers and County pools. Depending on the seriousness of the situation (heat persists longer than a few days), they are prepared to take greater action.
Mariposa	The county has excessive heat plans and they will be opening cooling centers and County pools. Depending on the seriousness of the situation (heat persists longer than a few days), they are prepared to take greater action.
Merced	The county has excessive heat plans and they will be opening cooling centers and County pools. Depending on the seriousness of the situation (heat persists longer than a few days), they are prepared to take greater action.
Modoc	The County will remain at normal operations. They are monitoring the situation but are not planning to open any cooling centers at this time.
Nevada	The county will be monitoring and take action if needed.
Plumas	No current plans.
Sacramento	They do not have any plans to activate cooling centers, nor do they have any weather conference calls planned. *As far as public communication – it will be consistent with messaging that the NWS and Regional Parks share regarding heat and safety along the rivers.
San Joaquin	OES will be following their Extreme Heat Plan: (forecast includes increasing risk, beginning Tuesday, with low to moderate, to one day of excessive temperatures with a high risk for heat related risk on Saturday,

	<p>decreasing to moderate risk the next day).</p> <p>OES Actions:</p> <ul style="list-style-type: none"> *Phase I – monitor Weather notices and HeatRisk page. *Monitor Cities for needs. *Increase public information to social media 2-3 days in advance. *Notify all county employees to prepare for high risk heat via email broadcast 2-3 days in advance. *OES is coordinating with partners/monitoring County WebEOC to share information with stakeholders (i.e. Public Health, EMS, etc)
Shasta	No action required at this time.
Sierra	No current plans.
Siskiyou	They will remain at normal operations. They are monitoring the situation but are not planning to open any cooling centers at this time.
Stanislaus	The county is monitoring and alerting their partner agencies who deal with populations at risk, sending out info on social media.
Sutter	No current plans.
Tehama	No current plans.
Trinity	No current plans.
Tulare	Per county OES, they follow the State's guidelines which are based on the Heat Index. They do not anticipate to reach their triggers but are monitoring the situation.
Tuolumne	<p>The county is not expecting to reach their trigger points for heat.</p> <p>No contingencies in place so far.</p>
Yolo	They will maintain heightened awareness of their areas throughout the county if a fire should start, given PG&E's new procedures of turning off power in areas that experience fire. OES reports that their GIS layer for Places to Cool Down, which CalOES GIS already consumes is up to date.
Yuba	No current plans.
